- RMA and Refurbishing

LTG's breadth and depth in technical expertise and integrated infrastructure networks are dedicated to support our customers' global expansion and product portfolio growth in:

- 1 Telecom Equipment / Telecom Infrastructure / Telecom Networking Gear
- 2 Enterprise Servers and Cloud Computing
- 3 Personal Computing and Mobile Devices
- 4 Smart Devices and Applications

Our integrated Post-Industrial Recovery (PIR) and Post-Consumer Recycling (PCR) platforms are customized per our clients' supply chain network for comprehensive improvement on: **Service, Solution and Value.**

- 1 TET asset values are captured and realized every-step along the forward supply chain, eliminating waste and disposal.
- 2 Total Reverse Supply Chain Management (RSCM) world-wide 3R services (Reuse, Remanufacturing, Recycle), resulting in cost reduction and maximizing financial returns.
- 3 Consolidated reporting, real-time tracking and settlement to reduce management costs and improve corporate risk management and compliance.
- 4 Unified world-wide online & offline consumer take-back programs.
- 5 Enable Cradle-to-Cradle and Design for Recycle programs by managing green supply chain in collaboration with R&D.

## Standard & Compliance

### Environment, Quality, Health and Safety

#### EQHS Standards & Policy

We are certified ISO 9001, ISO 14001, OHSAS 18001, R2 and compliant with local and international legislative requirements.

#### Operations and Environmental Protocols

We employ stringent operations and environmental protocols such as Standard Operation Procedures (SOP), Statement of Works (SOW), Service Level Agreement (SLA) and EHS protocols to ensure delivering consistent high level of services.

#### Downstream Vendors Qualification and Audit

All downstream vendors are fully licensed and audited on a regular basis and only those who conform to our strictest requirements can be qualified.

#### Minimized Landfill Policy

This objective is fully implemented throughout our facilities in all aspects of our operations and aims to achieve zero waste to landfill.

### Security Procedures

#### Data Destruction Procedures

We apply the secure chain-of-custody procedures and closely monitor and track all inventories we received. Devices with data storage capabilities will be sanitized following U.S. Department of Defense Sanitizing Standard (DOD 5220.22-M) before remarket or disposal.

#### Regulation Compliance

Checkpoints throughout the process guarantee equipment is handled in accordance with NAID standard and comply with privacy regulations.

#### Secure Facilities

Our facilities are equipped with 24/7 security monitoring and secure access entry systems.

### Qualifications
